

Project Progress Report #2

Marian Hristov - 2033348

Raagav Prasanna - 2036159

Guilherme Machado de Souza e Correa - 2035536

Issue ID	Task	MR	Assignee	Start Date	Duration	Problems	Status	Note
#8	Models for user management	link	Raagav	21/04	4 days	None	100%	
#11	Store images on the database and decode into an image type in python.	link	Raagav	25/04	1 day to date	Figuring out the best way to store binary data with Django	70%	We are probably going to use b64 to store it and decode it
#9	Create models for item-catalog.	link	Marian	21/04	4 days to date (3 hours of work)	Making links between comments, comment sections and posts and their relationship times. Gui will meet with Marian the night of the 26/04 to solve it with him.	60%	We (Marian and Gui) spend more time on it because we had to figure out a good pattern to respond to both replies and posts. We are probably going with the composite pattern.
#10	Design website identity	link	Guilherme	21/04	4 days to date	None	50% Main colors were already decided and header/Sidebar style too.	We are creating the main page in figma and deciding on the colors, UI and feeling of

								the website.
#13	Create Base API	link	Guilherme	26/04	3 hours	<p>I am waiting for all the models so I can know what data to send on the api.</p> <p>Also, I'm still learning how to write a Rest API using Django.</p>	10% Learning and test phase	
#-	Assist Raagav and Marian	-	Guilherme	-	-	<p>I managed my time poorly and couldn't help Raagav properly during the python lab because I was busy with another lab.</p>	-	<p>1. I and Raagav investigated how to store images in the database.</p> <p>2. I am helping Marian with the designing of the models for issue #10.</p>
#12	Submit Report 2	link	Guilherme	26/04	1 hour	None	100%
